

Building

Difficulty :

Pieces :

~17

Age :

+4

Duration :

~10 min

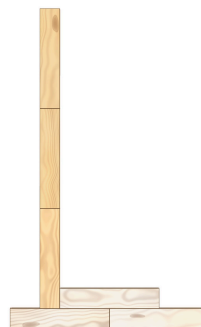

1

Lay two planks flat, end to end: this is the pavement. Just above, in the middle, add one Kapla for the window sill, the ledge under the windows.

2

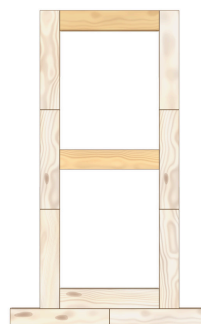

On the left end of the pavement, lay three planks in a line, running up your drawing.

3

Do the same on the right: three planks in a line, parallel to the first wall.

4

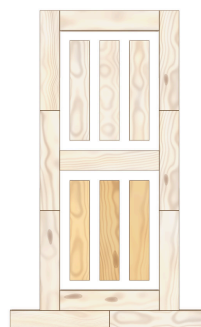

Between the two walls, lay one Kapla in the middle for the floor between the two storeys, and one at the very top for the roof.

5

In the upper storey, lay three planks side by side with a small gap between them. These are the windows.

6

Do the same in the lower storey, between the floor and the window sill. Your building is finished!

BRAVO!
