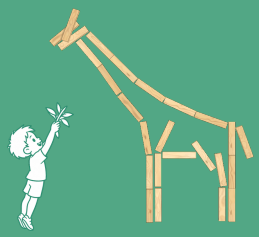
Giraffe (2D)

Difficulty :

Pieces : ~25

Age : +5

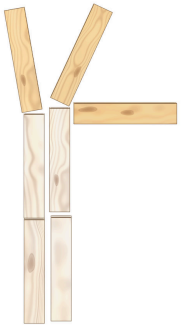
Duration : ~10 min



1

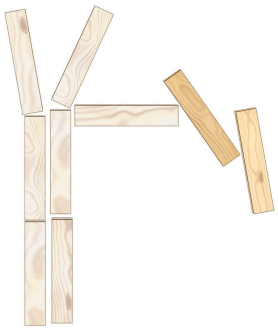
Lay 4 planks flat, two by two, to draw the 2 front legs. The leg on the right is slightly higher because it is further back.

2



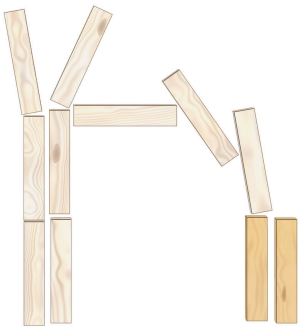
Above the front legs, lay 3 planks: 1 in line with the left leg to form the chest (slightly angled), 1 in line with the right leg, diagonally, to form the shoulder muscle, and 1 horizontally to start the belly.

3



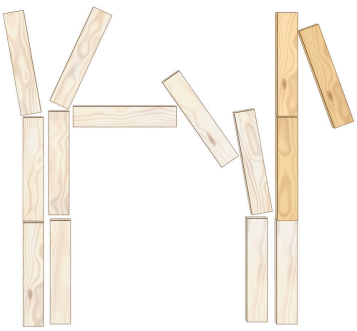
Add 2 planks diagonally downwards to finish the belly and draw the top of the thigh.

4



Lay 2 planks nice and straight, parallel, one next to the other, like the front legs.

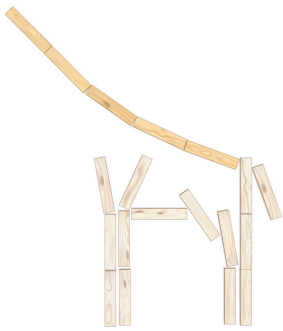
5



Draw the back end of the giraffe with 3 planks. Two go upwards in line with the back leg, and the last one goes off at an angle: that is the tail.

6

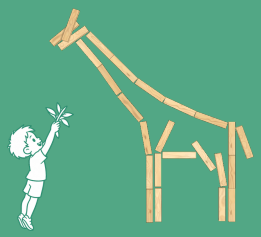
SUPER !



Lay 5 planks end to end, from the tail towards the front, rising a little each time. This is the giraffe's back, with a slight curve.

KAPLEA
BUILDING IMAGINATION

Giraffe (2D)



7

Lay 3 planks in a line, rising at an angle for the giraffe's neck. You can see in the picture that the planks are tilted slightly relative to each other, not perfectly straight, for more realism.

8

Finish with 3 planks at the end of the neck: 2 for the head, and 1 laid on top at a slant for the little horns. Your giraffe is finished!

BRAVO!
