

Ferry

Difficulty :

Pieces :

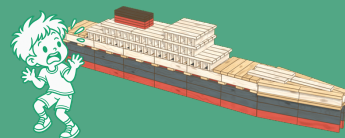

~199

Age :

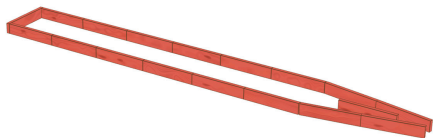

+8

Duration :

~60 min

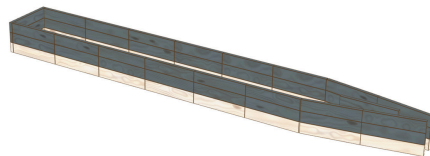

1

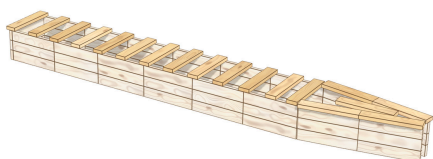

Stand 18 Kapla on edge for the hull, the body of the ship: 6 end to end on each side, 1 perpendicular to close the back. At the front, 2 slightly turned ones per side close the bow, the tip of the ferry, and 1 slips into the middle.

2

Stack 2 rows of 18 planks, exactly like the first one: 36 Kapla in all.

3

Lay 13 Kapla flat, perpendicular to the hull, from one side to the other, about every half Kapla: these are the crossbars, they hold the 2 sides together. Cover the bow with 5 flat planks.

4

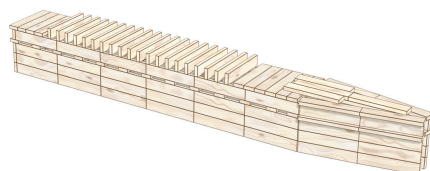

Stand a last row of 18 Kapla on edge, like the first 3: this is the sheer strake, the belt running around the ferry.

5

At the back, lay 4 Kapla flat side by side, perpendicular to the hull, and 6 at the front: these are the decks, the floors of the ship. Cover the bow again with 5 planks. Leave the middle empty.

6

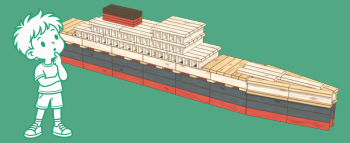

In the middle, stand 20 Kapla on edge, perpendicular to the hull, with the thickness of 2 Kapla between 2 planks: these are the windows. At the front, lay 4 Kapla flat on the deck.

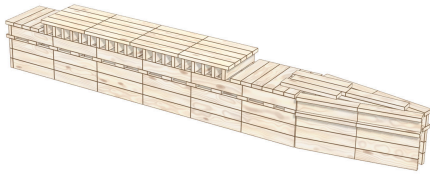

SUPER !

Ferry

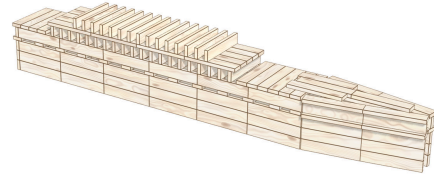

7

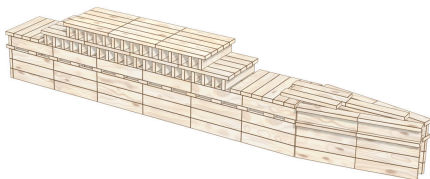

Cover the windows with 20 planks laid flat, along the ship:
4 rows of 5 Kapla side by side.

8

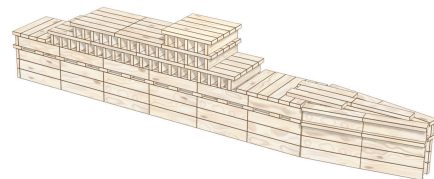

Do it again on top with 15 Kapla on edge, set back a little
at the front and the back: this is the upper deck.

9

Cover these windows with 15 planks laid flat: 3 rows of 5
Kapla side by side.

10

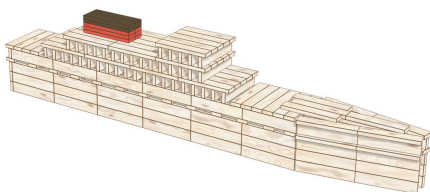

At the front of the upper deck, stand 5 Kapla on edge,
then cover them with 5 flat planks. This is the bridge, the
cabin the captain steers the ferry from.

BRAVO!

11

Behind the bridge, stack 5 levels of 2 Kapla flat side by
side: this is the funnel. Cast off!
