1

Lay four planks flat, two by two, to draw the two front legs.

2

Above the front legs, lay three Kapla: two at an angle for the chest, and one to start the belly.

3

Add two planks to finish the belly and draw the top of the thigh.

4

Lay two planks straight up, one above the other, just like the front legs.

5

Draw the back end of the giraffe with three Kapla, the last one at an angle: that is the tail.

6

Lay five planks end to end, from the tail forward, rising a little each time. This is the giraffe's back.

SUPER !

7

Lay three planks in a line, rising at an angle. This is the giraffe's long neck!

8

Finish with three planks at the end of the neck: two for the head, and one laid on top for the little horns. Your giraffe is finished!
