

Lighthouse

Difficulty :

Pieces :

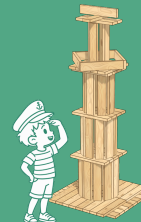

~92

Age :

+7

Duration :

~25 min

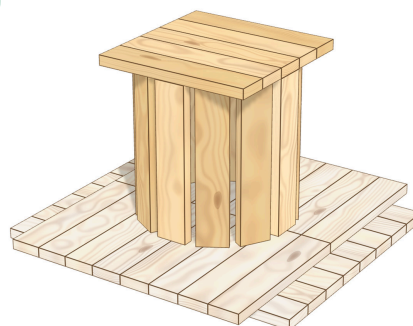

1

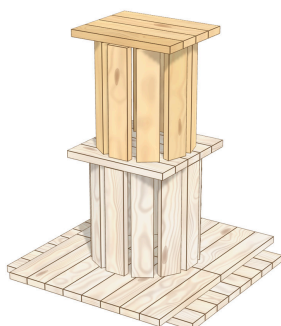

Lay 16 planks flat, 8 per row, to make a big rectangle. Cover it with 16 more Kapla laid in the opposite direction: this is the rock your lighthouse will stand on.

2

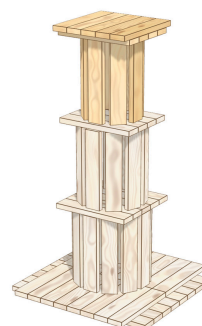

In the middle of the base, stand 12 planks up in a circle, leaving a small gap between them. Close the top with 5 Kapla laid flat, tight against one another.

3

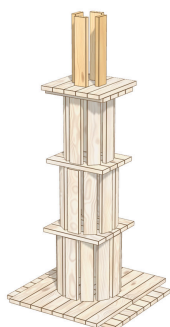

On this floor, build a smaller circle of 10 standing planks, then close it with 4 Kapla laid flat. The shaft, the body of the lighthouse, starts to narrow.

4

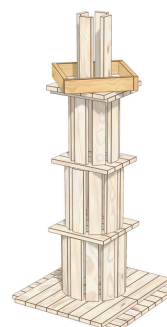

Build one last circle of 8 standing planks. Lay 4 planks flat on top, then 5 more across them in the other direction: this is the gallery, the balcony where the keeper watched the sea.

5

In the middle of the gallery, place 4 standing planks in a small square, again keeping the gaps. This is the lantern, the glass room where the lighthouse light shines.

6

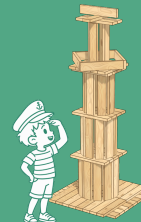

Around the lantern, set 4 Kapla on edge in a diamond: each one covers the end of the next, always turning the same way. This is the gallery railing.

SUPER!

Lighthouse

7

On the lantern, lay 2 planks flat side by side, one across them, then a last one on edge at the very top. Your lighthouse is ready to guide the boats!

BRAVO!
